**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11-24-2003 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

***Response to Arguments***

3. Applicant's arguments, filed 11-24-2003, with respect to WO 85/02175 have been fully considered and are persuasive. The 103 rejection of claims 1-10, 12, 70-73, 75-101 has been withdrawn.

Claims 1-10, 12, 70-73, 75-100 and 102 are rejected under 35 U.S.C. 102(e) as being anticipated by Singleton (5,780,694).

Singleton discloses a composition comprising a primary alcohol having an average number of branches ranging from 0.9 to 2.0 per molecule and wherein the primary alcohol sulfates made from said alcohols are readily biodegradable (col. 5, lines 57-67). Singleton teaches that said less than 25% branching at the C2 or C3 position (col. 6, lines 1-10); and 10-30% of ethyl branching and 10 to 50% of methyl branching (col. 5, lines 25-38). Moreover, Singleton teaches that said primary alcohols have less than 0.3 atom% of quaternary carbon atoms (col. 4, lines 30-40). See examples and claims.

***Allowable Subject Matter***

4. Claim 101 is allowed.

As this reference teaches all of the instantly required it is considered anticipatory.
